(c) - Board employs embedded, uninsulated wires welded to copper foil

@ - Minimum external Cu thickness in the rigid portion is 12 mic. Maximum internal Cu thickness in rigid portion is 70 mic. Minimum external and maximum internal Cu values indicated refers to flexible portion of the board.

NOTE - Type designations may be followed by 0.

* - CTI marking is optional and may be marked on the printed wiring board.

Marking: Company name or tradename "WE" or file number and type designation. May be followed by a suffix to denote factory identification or burning test classification.

The appearance of a company's name or product in this database does not in itself assure that products so identified have been manufactured under UL's Follow-Up Service. Only those products bearing the UL Mark should be considered to be Certified and covered under UL's Follow-Up Service. Always look for the Mark on the product.
